SAAS CUSTOMER  
COMMUNICATIONS FROM  
THE WORLD'S MOST  
TRUSTED CCM SOLUTION  
PROVIDER

## Inspire Evolve: communications built for the future

Inspire Evolve is a high-performance, SaaS customer communications solution from Quadient - the world's most trusted CCM provider. Inspire Evolve empowers non-technical business users to design, personalize and deliver secure, human-centric communications which are a vital part of an exceptional customer experience - all with minimal IT strain.

Inspire Evolve is cloud communications built for the future. As customer expectations and the demand for personal, secure, in-the-moment communications rise, a new CX standard has been set for all organizations. Consumers will continue to demand experiences that galvanize. Most businesses struggle to meet this new standard.

With customer data residing in different areas, and different solutions generating disparate customer communications, often those interactions rarely meet customer expectations of personalized, relevant content delivered with speed. Costly and inefficient IT processes, manual creation and editing of documents, and lack of brand and compliance control impede the delivery of a customer touchpoint that engages and drives market differentiation.

With Inspire Evolve, you can transform customer communications in hours, not months.

## INSPIRE EVOLVE: THE NEW STANDARD FOR CLOUD COMMUNICATIONS

**Dianne Thomson**

- Customer advocate for a large organization, responsible for handling incoming inquiries.
- 4 years of experience in call center environment.
- Aspires to become a leader for the team and improve the customer experience.

**Pamala McDonald**

- Customer for nearly a year, calling to understand the bill she has just received.
- She's always paid on or before the bill deadline.
- Enjoys the services the company provides to keep her home in top shape, but doesn't like surprises on her bills. She has a tight budget - every expense is accounted for.

Pamala called the customer service hotline.

Dianne reviews the services provided and notices an error on the bill.

Dianne populates a new bill with the correct amount and adds a personal note - the next service will be free - and sends to Pamala immediately.

Days later, Dianne checked the dashboard and the bill emailed has gone unread. She gently nudges Pamala via SMS, so the customer can avoid a late payment fee.

Pamala received the message on her mobile phone and reviewed her email.

## INSPIRE EVOLVE GIVES YOU THE POWER TO:

### TRANSFORM CUSTOMER COMMUNICATIONS IN HOURS

**Make every connection matter with intuitive, flexible and intelligent applications.** Inspire Evolve makes even the most complex experiences simple by enabling intelligent workflows for creating and delivering customer communications.

### DESIGN HUMAN-CENTRIC COMMUNICATIONS; MANAGE AND CONTROL CONTENT

**Safely and securely connect in-the-moment.** Inspire Evolve guarantees that customers receive a personalized message at any time of the day or night. Designers can create templates according to branding and personalization rules and use approval workflows to ensure compliance is maintained. Customer service representatives or other team members are also able to personalize communications before sending to a customer.

### SCALE ACROSS YOUR ENTERPRISE

**Send scalable, secure communications with a service built for volume and compliance.** Inspire Evolve pulls data from any source, handling scalability and security needs to create personalized 1:1 communications or multiple communications, handled with industry-leading speed by the batch service.

### RESERVE IT RESOURCES FOR HIGH-VALUE EFFORTS

**Safely design communications that are maintained by your lines of business, not IT.** By using a SaaS customer communication solution, complex recurring software upgrade costs are consigned to history, releasing key IT resources to support your wider transformation programs.

**Making a communications change using traditional IT models takes, on average, two or three months, but a cloud-based platform underpinned by smart content and intelligent approval workflows enables business users to make changes themselves and can significantly shorten cycle times, in some instances, making changes virtually in an instant.**
